CGPA: 8.9 | 2018 – 2021

PROFESSIONAL SUMMARY

An enthusiastic Flutter Developer with hands-on experience in creating cross-platform mobile applications. Skilled in Flutter, Dart, FastAPI, and REST API integrations. Passionate about building intuitive mobile experiences and ensuring seamless functionality through thorough testing and debugging. Strong trainer background with a proven ability to mentor and lead.

EXPERIENCE

Jr. Flutter Developer

Skill College | Ahmedabad | May 2024 – Mar 2026

- Implemented client-side form validations, error handling, and secure authentication flows.
- Collaborated with backend developers to align API requirements and improve data exchange.
- Optimized application performance by reducing widget rebuilds and improving state handling.
- Used Git for code versioning, branch management, and collaborative development.
- Managed local data storage using SQLite and Shared Preferences.
- Integrated push notifications and real-time data syncing using Firebase services.
- Worked in an Agile/Scrum environment with daily stand-ups and task tracking.
- Performed UI/UX improvements based on user and team feedback.
- Ensured compatibility across different screen sizes and device types.
- Maintained clean architecture and modular code structure.

Flutter Trainer

TOPS Technologies Pvt | Ahmedabad | Feb 2022 – Apr 2024

- Conducted classroom and offline training sessions on Flutter and Dart for students and trainees.
- Created structured training modules, lesson plans, assignments, and practical tasks.
- Taught fundamentals and advanced concepts including UI development, state management, API integration, Firebase, and local storage.
- Guided students in developing real-time mobile applications from scratch.
- Assisted trainees in debugging issues and resolving code challenges.
- Evaluated student performance, progress, and project submissions regularly.
- Supported students in interview preparation, resume building, and technical assessments.

PROJECTS

Faculty Attendance App

A mobile application designed to streamline attendance management with real-time updates.

- Flutter app for managing attendance records with real-time updates.
- Tech Stack: Flutter, GetX, Firebase, REST API, SQLite
